SUMMARY

Creative Fullstack Developer leveraging JavaScript to build responsive websites, mobile apps, and interactive features that drive business growth and improve UX.

TECHNICAL SKILLS

Languages
- JavaScript , SQL, HTML, CSS

Libraries/Frameworks
- React-Native, React, Redux, Node.js/Express, Sass, Styled Components, Jest, jQuery, Bootstrap
- MongoDB, MySQL, PSQL

Control/Deployment
- Github, Heroku, Netlify, S3, Elastic Beanstalk

EXPERIENCE

Bchain, LLC   New York, New York
Full Stack Developer   Oct 2019-present
- Designed User Interactive (UI) Webpages and visually appealing User Interfaces with the help of HTML, CSS, SASS, UX Design, Adobe XD, prototypes, and style guides.
- Resolved complex issues related to browser and network performance, cross-browser compatibility, client-side scaling, data modeling, usability and testability

Mobile Application
- Developed using the microservices architecture, the frontend was built in react-native and the backend was built with express.
- Performed unit, system and integration testing and participated in capacity/performance testing of the application
- Contributed, reviewed and provided feedback to the application's documentation

PROJECTS

Lady Bird
- Built using express in the backend and React for client side rendering.
- Lady Bird is an application that allows the owner to login with Google oauth and use CRUD functionality to modify the menu. The menu is saved in a PSQL database where they can fetch the data at anytime.
- Technologies used: Express, React, Node.js, PSQL, Google Oauth, JavaScript, CSS, HTML.

Galaxy Warriors
- Designed to imitate a classic space invaders game, this site leverages object oriented programming principles to construct the characters.
- A player is able to select from three different spaceships, and this state will be stored in local storage. After the monster or player decrements the life points to win, a play again modal will be displayed.
- Technologies used:Javascript, CSS, HTML, Local Storage.

EDUCATION

General Assembly   New York, New York
Software Engineering Student   December 2018
- Achieved 650 hours of full stack application development.
- Created three main projects utilizing a variety of languages/technologies that are listed in the projects section.

University of Wales   Tashkent, Uzbekistan
Management Development Institute of Singapore in Tashkent   May 2013
Bachelors of Science, Concentration in Banking and Finance, *GPA: First Class Honours*

CERTIFICATIONS

- Certificate from the University of Economics and Management of Czech Republic

LANGUAGES

- English, Russian, Uzbek
